ZAINAB ANWAR

Full Stack Developer | Data Science Enthusiast

03363385351 | zainabanwer2152@gmail.com | Karachi, Pakistan | linkedin.com/in/zainab-anwer | github.com/ZainabAnwer

PROFILE

Software Engineering student specializing in full stack web development (React, Node.js, Express) and data science (Python, Scikit-learn, ML pipelines). Has independently designed, built, and deployed multiple end-to-end applications — from responsive React frontends to trained ML models served through Streamlit. Detail-oriented and analytical, with strong problem-solving ability and experience following the software development lifecycle (SDLC) through coursework in Software Design & Architecture and Software Construction. Comfortable working across the stack — UI, RESTful APIs, databases, and data analysis — both independently and in team settings.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, HTML, CSS, C#, Dart, SQL

Full Stack: React JS, Redux, Node JS, Express JS, RESTful APIs, Tailwind CSS, MongoDB, SQL, FastAPI, Object-Oriented Programming (OOP)

Data Science / ML: Pandas, NumPy, Scikit-learn, TensorFlow/Keras, PyTorch, Matplotlib, Seaborn, Streamlit, NLP

Mobile: Flutter, Dart, Firebase

Practices & Concepts: Software Development Lifecycle (SDLC), Software Design & Architecture, Git/GitHub Version Control, Problem Analysis, Attention to Detail, Teamwork

PROJECT EXPERIENCE

E-commerce Website | *React JS, Tailwind CSS* — ecommerce-website-delta-nine-49.vercel.app

- Built a full-stack-style e-commerce interface with product catalog, cart, and checkout flow, structured as reusable React components for maintainability.

Mini LMS | *React JS* — mini-lms-sandy.vercel.app

- Developed a Learning Management System UI supporting course browsing and content structuring, focused on clean state management and navigation.

Customer Behavior Prediction | *Python, Machine Learning, NLP*

- Built a sentiment analysis model that classifies customer feedback as positive or negative and estimates purchase likelihood from review sentiment, as part of Data Science coursework.

Mobile Usage Analysis | *Python, Pandas, NumPy, Scikit-learn, Streamlit* — mobile-usage-analysis-2yjucegwvht4xrxcdzsw3e.streamlit.app

- Analyzed mobile usage behavior data and trained a Random Forest model, deployed through an interactive Streamlit dashboard for exploring predictions and trends.

Student Rental Hub | *Flutter, Dart, Firebase* — student-rental-hub-e4883.web.app

- Built and deployed a cross-platform rental listing app for students with Firebase backend for auth and data storage.

KFC Website | *React JS (Static)* — kfc-website-ten.vercel.app

- Recreated a responsive static brand website focused on pixel-accurate layout and component structure.

Personal Portfolio | *React JS, Tailwind CSS* — my-portfolio-pi-eight-83.vercel.app

- Designed and built a personal portfolio site to showcase projects and skills.

EDUCATION

Sindh Madressatul Islam University — Karachi

Bachelor of Science in Software Engineering (BSSE) 2023 – Present

Relevant coursework: Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Design and Architecture, Database Management, Artificial Intelligence, Data Science, Web Engineering, Software Construction and Development (SDLC), Software Project Management, Mobile Application Development.

CERTIFICATIONS

- GitHub Student Developer Pack
- Microsoft Learn Student Ambassador
- Banoqabil — Web Development with AI
- Banoqabil — Frontend Development with React & Next.js
- Banoqabil — Backend Development with Node JS
- DR Coders — GitHub, LinkedIn & Upwork Workshops
- EDU4TEEN — Web Development Course
- View Certificates: www.zainabcertificate.com
